

M9-MQ Box-L

USB Gateway 902MHz

Features

The USB gateway M9-MQ Box-L is a bidirectional IoT gateway for easy setup of an EnOcean wireless infrastructure. The integration into IoT systems and power supply is done via Micro-USB e.g. to Aruba Access Points or third party edge controllers. M9-MQ Box-L supports bidirectional transmission of all EnOcean equipment profiles incl. encryption via ESP3 and is therefore easy to retrofit and at the same time future-proof.

Technical Specifications

Radio Interface:	EnOcean, 902 MHz	
Supported Profiles:	EnOcean EEP v3.1, EnOcean Security v2.6	
Antenna:	external, SMA connector	
Connectivity:	Micro-USB 2.0	
Communication Profile:	EnOcean Serial Protocol 3.0 (ESP3)	
Power Supply:	Micro-USB 2.0	
Power Consumption:	max. 0,6W at 5VDC	
Dimensions (LxWxH):.....	70,5x70,5x26,8 mm	

Delivery Scope

M9-MQ Box-L, Micro-USB cable 1m, ext. EnOcean antenna, short manual

Accessories (optional)

Ext. EnOcean antenna with 2,5m cable
