

M9-PIPM

Plug-In Power Monitor

Description

Magnum First's Plug-In Power Monitor (M9-PIPM) will send On/Off signal to the appliance that is attached to this module by receiving an EnOcean signal from the controller or manually switch. It also sends the energy consumption to the controller when it requests. With special design, this module won't interfere with the other power outlet when it is plugged into the AC outlet. This module can also act as a repeater.

Features:

- * Plug Connection
- * Auto Inclusion
- * 3 Steps LED Indication - Green/ Orange/ Red
- * Max. Current: 15A
- * Input Voltage: 90-230 VAC
- * Power Monitor Range: Watt: 0.1W-2200W@220VAC

Specifications:
